

BOKUM TOOL CO.

BOKUM TOOL COMPANY INC.

We are known throughout the world for our quality boring, recessing, threading tools and tool holders.

Bokum Tool Company is a third-generation family-owned company. For over fifty-five years we have built a reputation for quality and precision in the manufacture of boring, recessing and threading tools. We offer these tools either as standard off the shelf or custom made.

Bokum Tool is a leader in the design of tools and accessories that make machining operations easier to set up, quicker to run and more economical on both high-volume and piece work runs.

BORING TOOLS

Bokum Tool specializes in the boring of holes from 1/16" in diameter up to 2" in diameter. These tools are offered in both high speed steel and carbide. We stock over 1,600 types of boring tools, ready for immediate shipment.

All of our boring tools are ground with constant radial and helical relief, which means the top face need only be resharpened to maintain correct clearances. The high speed steel and carbide head tools offer a full 210 degrees of regrind life, which reduces your cost per cutting edge.

RECESS TOOLS

We stock over 258 recess cutting tools in four different styles; retaining ring, O-ring, thread recessing and back chamfering. The selection we offer gives our customers the widest range of tool flexibility and versatility for their applications. Our recess tools also incorporate radial relief design, ensuring proper clearance angles and eliminating tool rubbing.

SPECIAL TOOLING

Our standard tools can be altered to meet our customers' special tooling needs, or special tooling can be designed by our engineers to meet any special applications required by our customers.

THREADING TOOLS

Our precision threading tools offer accuracy and a clean finish. Bokum threading tools can help reduce or eliminate reject parts, which translates into customer savings.

With our threading tools, setups are fast and easy because our cutting clearance angles remain constant. Because of our 210 degree tool form design, the life of the tool is greatly extended because of the number of regrinds possible. This translates into lower tool cost, longer tool life and customer savings!

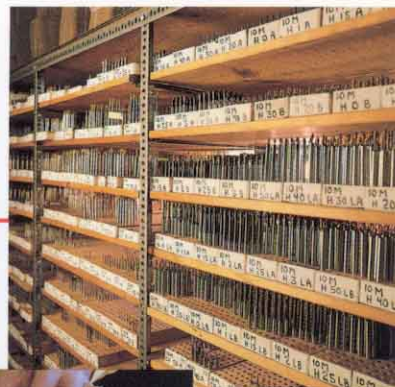

BOKUMATIC RECESS TOOL HOLDERS

Bokum Tool Company has been instrumental in the design and development of automatic recess tool holders. Our design allows our holders to be used on virtually any kind of machine, from low production lathes and drill presses to high volume N/C machining centers producing close-tolerance parts.

One of the many concepts designed into our holders includes better length-to-diameter ratio. This allows greater accuracy of machined parts and extended durability of the holder.

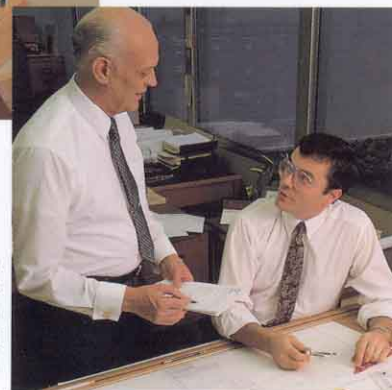

When used with our tool holders, cutting tools will last three to five times longer. In addition, with our pre-set tooling concept, we have reduced the need for extended setup time.

We stock over 1,600 types of boring tools and over 250 recess cutting tools.

Bokum tool sets are boxed to protect their precision-ground cutting edges.

Bokum engineers have the expertise to help you meet almost any tooling requirement.

Bokum is your headquarters for precision boring, recessing and threading tools.

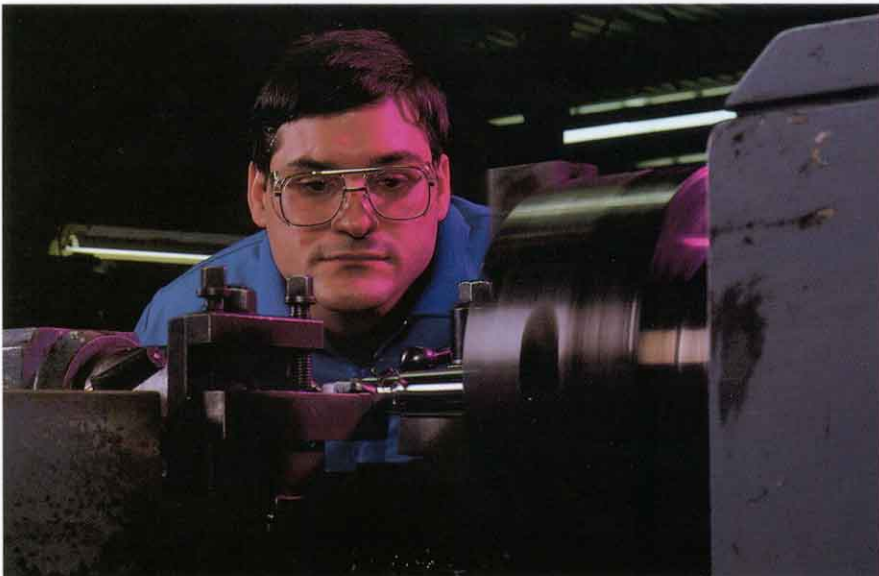

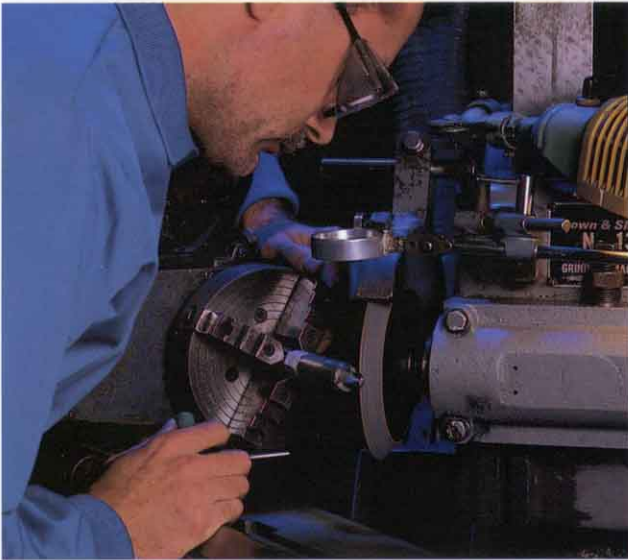

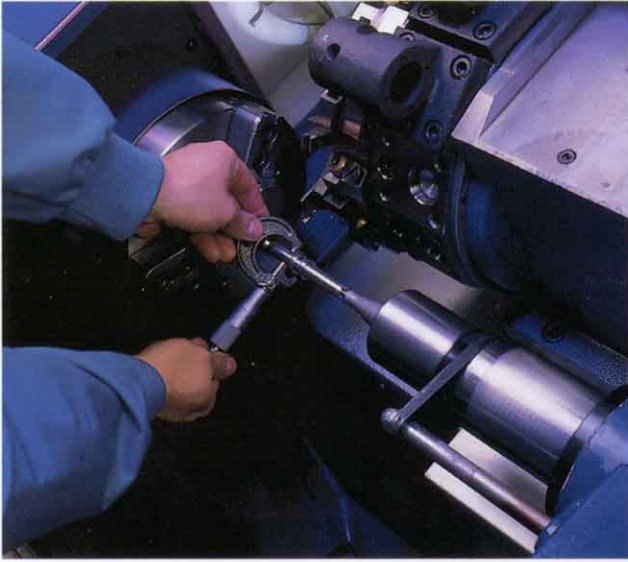

Our customers know the quality and durability that Bokum tools and tool holders have to offer. That's why most machine tool builders in the U.S. recommend our recess tool holders. A majority of all grooving done with holders in this country is done with Bokum recess tool holders.

We have invested extensively in our engineering and product development capabilities so that we can provide the technical knowledge to help you choose the right tool for your specific applications.

We know the capabilities of our products. Since we are a full-line supplier of boring, recessing and threading tools, we may already carry the tools you need. If you have a special application or tool requirement, our Engineering Staff will design the tooling to your specifications.

Call Bokum Tool for information on how we can help you achieve greater productivity and economy in your boring, recessing and threading operations.

Our system of tools and tool holders can enhance the flexibility, efficiency and cost savings of almost any boring, recessing or threading operation.

BOKUM TOOL COMPANY INC.

Bokum Tool has representatives located throughout the U.S., Canada and Mexico. Call us for the name of our representative in your area.
